Enfora GSM1218
Quad-Band SA-GL
User Manual

Revision 1.03

Document Title:	Enfora GSM/GPRS Quad-Band SA-GL User Manual
Version:	1.03
Date:	02/14/05
Status:	Released
Document Control ID:	GSM1218PB001MAN

General

All efforts have been made to ensure the accuracy of material provided in this document at the time of release. However, the items described in this document are subject to continuous development and improvement. All specifications are subject to change without notice and do not represent a commitment on the part of Enfora L.P. Enfora L.P. will not be responsible for any loss or damages incurred related to the use of information contained in this document.

This product is not intended for use in life support appliances, devices or systems where a malfunction of the product can reasonably be expected to result in personal injury. Enfora L.P. customers using, integrating, and/or selling this product for use in such applications do so at their own risk and agree to fully indemnify Enfora L.P. for any damages resulting from illegal use or resale.

Limited Warranty

ENFORA L.P. 12-MONTH LIMITED WARRANTY

Enfora warrants to the original purchaser of the product that, for a period of one (1) year from the date of product purchase, the product hardware, when used in conjunction with any associated software (including any firmware and applications) supplied by Enfora, will be free from defects in material or workmanship under normal operation. Enfora further warrants to such original purchaser that, for a period of ninety (90) days from the date of product purchase, any software associated with the product will perform substantially in accordance with the user documentation provided by Enfora, and any software media provided with the product will be free from defects in material or workmanship under normal operation. Enfora does not warrant that the product hardware or any associated software will meet the purchaser's requirements or that the operation of the product hardware or software will be uninterrupted or error-free. This limited warranty is only for the benefit of the original purchaser and is not transferable.

During the warranty period applicable to the product hardware, Enfora, at its expense and in its sole discretion, will repair or replace the product if it is determined to have a covered hardware defect, provided that the purchaser first notifies Enfora of any such defect, furnishes Enfora with a proof of purchase, requests and obtains a return merchandize authorization (RMA) number from Enfora, and returns the product, shipping charges prepaid, to Enfora under that RMA. If, upon reasonable examination of the returned product, Enfora does not substantiate the defect claimed by purchaser, or determines that the defect is not covered under this limited warranty, Enfora will not be required to repair or replace the product, but may instead reship the product to the purchaser, in which case purchaser shall be responsible for paying Enfora's usual charges for unpacking, testing, and repacking the product for reshipment to purchaser. Purchaser shall bear the risk of loss or damage in transit to any product returned by purchaser to Enfora, or any returned product not found to be defective or covered under this warranty and reshipped by Enfora to purchaser. In the event Enfora repairs or replaces a defective product, the repaired or replacement product will be warranted for the remainder of the original warranty period on the defective product. If Enfora is unable to repair or replace a defective product, the purchaser's exclusive remedy shall be a refund of the original purchase price. Any returned and replaced product, or any product for which Enfora has refunded the original purchase price, becomes the property of Enfora.

During the warranty period applicable to the software or its media, Enfora, at its expense, will replace any defective software or media if purchaser gives written notification of the defect to the technical support department at Enfora during the applicable warranty period. Enfora shall not have any obligation to provide any software bug fixes, upgrades or new releases except as necessary to correct any covered defect of which purchaser notifies Enfora during the applicable warranty period.

Enfora shall have no obligation under this limited warranty for (a) normal wear and tear, (b) the cost of procurement of substitute products or (c) any defect that is (i) discovered by purchaser during the warranty period but purchaser does not notify or request an RMA number from Enfora, as required above, until after the end of the warranty period,

(ii) caused by any accident, misuse, abuse, improper installation, handling or testing, or unauthorized repair or modification of the product, (iii) caused by use of any software other than any software supplied by Enfora, or by use of the product other than in accordance with its documentation or (iv) the result of electrostatic discharge, electrical surge, fire, flood or similar causes.

ENFORA'S SOLE RESPONSIBILITY AND PURCHASER'S SOLE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE TO REPAIR OR REPLACE THE PRODUCT HARDWARE, SOFTWARE OR SOFTWARE MEDIA (OR IF REPAIR OR REPLACEMENT IS NOT POSSIBLE, OBTAIN A REFUND OF THE PURCHASE PRICE) AS PROVIDED ABOVE. ENFORA EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY, SATISFACTORY PERFORMANCE AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL ENFORA BE LIABLE FOR ANY INDIRECT, SPECIAL, EXEMPLARY, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOSS OR INTERRUPTION OF USE, DATA, REVENUES OR PROFITS) RESULTING FROM A BREACH OF THIS WARRANTY OR BASED ON ANY OTHER LEGAL THEORY, EVEN IF ENFORA HAS BEEN ADVISED OF THE POSSIBILITY OR LIKELIHOOD OF SUCH DAMAGES.

Some jurisdictions may require a longer warranty period than specified above and, accordingly, for products sold in those jurisdictions the applicable warranty period shall be extended as required under the law of those jurisdictions. Furthermore, some jurisdictions may not allow the disclaimer of implied warranties or the exclusion or limitation of incidental or consequential damages, so the above disclaimer, limitation or exclusion may not apply to products sold in those jurisdictions. This limited warranty gives the purchaser specific legal rights and the purchaser may have other legal rights that vary from jurisdiction to jurisdiction.

In some instances, certain aspects of the product warranty may also be covered in a separate written agreement between Enfora and the distributor or reseller, if any, from whom purchaser purchased the product. That agreement may provide, for example, a longer warranty period or a different product return procedure that may also be available to purchaser (e.g., the product may be returned to Enfora through the distributor or reseller).

This limited warranty shall be governed by the laws of the State of Texas, United States of America, without regard to conflict of laws principles. This limited warranty shall not be governed in any respect by the United Nations Convention on Contracts for the International Sale of Goods.

1   Introduction

1.1   About the GSM/GPRS SA-GL

The GSM/GPRS SA-GL is a compact, stand-alone wireless IP (GSM/GPRS) modem. The GSM/GPRS SA is designed for computing devices operating Windows 98 SE, XP, 2000 Professional and ME. The platform can be used as a stand-alone serial device with other vertical applications. Enfora's GSM/GPRS SA-GL provides maximum versatility in a single affordable device.

1.2   About this Manual

Contained in this manual are instructions on how to install and configure the GSM/GPRS SA-GL modem. Please follow the instructions herein closely to avoid damaging the GSM/GPRS SA-GL.

The GSM/GPRS SA-GL modem contains an Enfora Enabler-IIG OEM module. Detailed information pertaining to the specifications and operation of the module will pertain, in part, to the GSM/GPRS SA-GL platform.

The information can be accessed at the Enfora website under Support/Downloads.

Refer to the following documentation for additional information, if required:

Enabler-G AT Command Set GSM0102PB001MAN
Enabler II-G Integration Guide GSM1208PB001
Enfora GSM-GPRS Family UDP-API Reference GSM0102PB002MAN

GSM0000AN001 - Enabler-G PPP Configuration for Windows 98
GSM0000AN002 - Enabler-G PPP Configuration for Windows 2000
GSM0000AN003 - Enabler-G Data Circuit Switched Call Configuration and Use
GSM0000AN004 - Enabler-G SMS Configuration and Use
GSM0000AN005 - Enabler-G Automated Network Connection Configuration and Use
GSM0000AN006 - Enabler-G Module Status Query
GSM0000AN007 - Enabler-G Status Reporting
GSM0000AN008 - Enabler-G PPP Configuration for Windows XP
GSM0000AN009 - Dynamic IP Assignment Support
GSM0000AN010 - Enabler-G PPP Configuration for PocketPC 2002
GSM0000AN011 - PAD Configuration and Use
GSM0000AN012 - Network Transparency Configuration for PAD
GSM0000AN013 - Enabler-G Sleep Mode Configuration and Use
GSM0000AN014 - Anytime PPP API Access

1.3   System Requirements

- Windows 98 SE / XP / 2000 Professional / ME operating systems or other serial-enabled platform
- One standard RS-232 serial port for GSM/GPRS SA GL configuration
- One standard plug for speaker and microphone*

*not required for stand alone operation

1.4   SA-GL Front and Back View

Figure 1: Front view of GSM/GPRS SA-GL modem.

Figure 2: Rear view of GSM/GPRS SA-GL modem.

2 Regulatory Compliance FCC

- The modem was tested and certified to meet FCC Parts 15 in a stand-alone configuration, which demonstrated that the GSM/GPRS SA-GL complies with Part 15 emission limits. FCC Part 22 & Part 24 certification is covered by the Enfora Enabler-IIG "modular approval" process for a transmitter. This approach, described by FCC Public Notice DA 00-131407 released June 26, 2000, is intended to afford relief to equipment manufacturers by eliminating the requirement for obtaining a new equipment authorization for the same transmitter when installed in a new device.

- In order to use the GSM/GPRS SA-GL without additional FCC certification approvals, the installation must meet the following conditions:

    - For the transmitter to meet the MPE categorical exclusion requirements of 2.1091, the ERP must be less than 1.5 watts for personnel separation distance of at least 20 cm (7.9 in). Therefore, the maximum antenna gain cannot exceed +3.3dBi. If greater than 1.5 watts exists, then additional testing and FCC approval is required.

2.1 Disclaimer

The information and instructions contained within this publication comply with all FCC, GCF, PTCRB, RTTE, IMEI and other applicable codes that are in effect at the time of publication. Enfora disclaims all responsibility for any act or omissions, or for breach of law, code or regulation, including local or state codes, performed by a third party.

Enfora strongly recommends that all installations, hookups, transmissions, etc., be performed by persons who are experienced in the fields of radio frequency technologies. Enfora acknowledges that the installation, setup and transmission guidelines contained within this publication are guidelines, and that each installation may have variables outside of the guidelines contained herein. Said variables must be taken into consideration when installing or using the product, and Enfora shall not be responsible for installations or transmissions that fall outside of the parameters set forth in this publication.

Enfora shall not be liable for consequential or incidental damages, injury to any person or property, anticipated or lost profits, loss of time, or other losses incurred by Customer or any third party in connection with the installation of the Products or Customer's failure to comply with the information and instructions contained herein.

3   Installation

3.1 Subscriber Identity Module (SIM) Card

The SIM, an integral part of any GSM terminal device, is a "smart card" that is programmed with subscriber information. The user information consists of an International Mobile Subscriber Identity (IMSI) number, which is registered with the GSM service provider, and an encryption Ki (pronounced "key"). This information consists of a microprocessor and memory installed on a plastic card. To install the SIM card into the modem, insert the SIM card in the modem as shown below in Figure 3.

Note: The SIM is *not* provided with the SA-GL modem. The SIM must be obtained from the GSM service provider and must be provisioned by the operator for data and/or voice. Always take care to protect the SIM: the GSM terminal will not operate without the SIM installed.

Figure 3: Inserting a SIM Card in a GSM/GPRS SA-GL Module

3.2   Connecting the Power Supply

The GSM/GPRS SA-GL modem can utilize input power ranging from 5 Vdc to 9 Vdc. If your unit did not include an optional, power supply or if you wish to configure a separate power interface, the following connector parts can be used to mate with the existing modem power connector:
Connector Pins - Molex 43030-0009 MICROFIT TERM Gold 20-24

Plastic Housing - Molex 43025-0200 3.0mm (.118") Pitch Micro-Fit, Jr.™ Receptacle, Dual Row (the Enfora GSM/GPRS SA-GL incorporates a 2-pin configuration)

WARNING:
When assembling the Molex connector, plug the Positive (+)
power lead in the bottom of the Molex connector. Improper
connections will render the unit inoperable and will void the product warranty.

Proper Molex Configuration

(-)Power Lead

(+)Power Lead

To supply power to the GSM/GPRS SA-GL modem, connect the power supply to the power connector (labeled "**Power**") on the modem. Connect the other end of the power cable to a power source.

Note: Make sure the SIM card is inserted prior to connecting the power supply to the SA-GL.

Figure 4: Connecting The Power Supply To SA GL

The following tables provide the power characteristics of the GSM/GPRS SA-GL modem.

Enfora -GL (@ 9 Volts)			Average Current (mAmps)	Peak Current (Amps)
GSM 850	**GSM**	1 TX 1 RX 1 RX Idle Sleep	230 mA 160 mA 50 mA 15 mA	1.42 A @ 32 dBm
GSM 900	**GSM**	1 TX 1 RX 1 RX Idle Sleep	220 mA 160 mA 44 mA 15 mA	1.70 A @ 33 dBm
DCS 1800	**GSM**	1 TX 1 RX 1 RX Idle Sleep	210 mA 160 mA 40 mA 15 mA	1.45 A @ 30 dBm
PCS 1900	**GSM**	1 TX 1 RX 1 RX Idle Sleep	215 mA 156 mA 40 mA 15 mA	1.50 A @ 31 dBm

Table 1: GSM Operating Power

3.3 Connecting the Serial Cable

To connect the SA-GL with a local computing device, connect one end (male end) of the 9-wire RS232 Serial Cable to the SA-GL port labeled "**Serial**" and connect the other end to a computer.

Figure 5: Connecting the Serial Cable to SA-GL

3.4 Connecting the GSM/GPRS Antenna

The antenna is supplied by the user. The antenna must have a nominal impedance of 50 Ohms. The VSWR must be less than 2.0:1. System antenna gain should be 0-2 dB for optimum performance. See section 2 Regulatory Compliance FCC.

The GSM/GPRS SA-GL operates at the 850/900/1800 and 1900 MHz frequency bands. Care needs to be taken when connecting the antenna since the right type of antenna will be required for proper operation of the modem. The antenna connector on the GSM/GPRS SA-GL modem is SMA Female. The antenna has to be connected to the connector labeled "**Antenna**" as shown below in Figure 6.

Figure 6: GSM/GPRS SA-GL Connecting the Antenna

3.5 Attaching a Microphone/Speaker

To place a voice call, insert a microphone/speaker to the port labeled "**MIC AUDIO**" as shown below in Figure 7. The plug is a standard 2.5mm audio connector. Many existing mobile phone headsets can be used.

Figure 7: Attaching a Headset to the GSM/GPRS SA-GL Module

3.6 LED Functions

The GSM/GPRS SA-GL modem has one LED on the front panel.

> **REG**: Indicates GSM network registration status. Flashing when attempting to register on a GSM network. Solid when the modem is registered with a GSM network.

3.7 Mounting the SA-GL

The GSM/GPRS SA-GL includes two mounting options. The modem housing contains four thru holes that can utilize number 2 screws for securing the device. The other option available is the inclusion of four threaded holes for securing screws to be used to secure the device.

4   Frequently Asked Questions (FAQ)

Q. How do I configure a PPP connection for the Windows 98?
A. Refer to "*GSM0000AN001 - Enabler-G PPP Configuration for Windows 98*" application note for details.

Q. How do I configure a PPP connection for Windows 2000?
A. Refer to the "*GSM0000AN002 - Enabler-G PPP Configuration for Windows 2000*" application note for details.

Q. How do I send and receive data and voice calls to/from a remote host?
A. Refer to "*GSM0000AN003 - Enabler-G Data Circuit Switched Call Configuration and Use*" application note for details.

Q. How do I send and receive SMS messages?
A. Refer to "*GSM0000AN004 - Enabler-G SMS Configuration and Use*" application note for details.

Q. How do I automate GSM/GPRS network connectivity on the SA GL?
A. Refer to the "*GSM0000AN005 - Enabler-G Automated Network Connection Configuration and Use*" application note for details.

Q. How do I query modem status parameters?
A. Refer to "*GSM0000AN006 - Enabler-G Module Status Query*" application note for details.

Q. How can I set detailed status reporting?
A. Refer to the "*GSM0000AN007 - Enabler-G Status Reporting*" application note for details.

Q. How do I configure a PPP connection for Windows XP?
A. Refer to the "*GSM0000AN008 - Enabler-G PPP Configuration for Windows XP*" application note for details.

Q. How can I use the Dynamic IP reporting feature on the SA-GL?
A. Refer to the "*GSM0000AN009 - Dynamic IP Assignment Support*" application note for details.

Q. How do I configure a PPP connection for PocketPC 2002?
A. Refer to the "*GSM0000AN0010 - Enabler-G PPP Configuration for PocketPC 2002*" application note for details.

Q. How can I use the UDP Packet Assembler/Disassembler feature on the SA-GL?
A. Refer to the "*GSM0000AN011 - PAD Configuration and Use*" application note for details.

Q. How do I configure transparent or non-transparent access using PAD on the SA-GL?
A. Refer to the "*GSM0000AN012 - Network Transparency Configuration for PAD*" application note for details.

Q. How do I configure different sleep modes on the SA-GL?
A. Refer to the "*GSM0000AN013 - Enabler-G Sleep Mode Configuration and Use*" application note for details.

Q. How do I configure the SA-GL for PPP API access without having network connectivity?
A. Refer to the "*GSM0000AN014 - Anytime PPP API Access*" application note for details.

5   Tech Support

For problems stemming from your network access, contact your GSM/GPRS carrier service. For technical support and customer service dealing with the modem itself, contact the company where you purchased the product. If you purchased the product directly from Enfora, visit the SUPPORT page on the Enfora website: http://www.enfora.com.
